DETAILED ACTION

Response to Communication(s)

1. This office action is in response to the Amendment filed on May 4th, 2009. Claims 2-4, 11-12 and 19 are now canceled. Claims 1, 5-10, 13-18 and 20-24 are now pending in the application.

Response to Amendment/Arguments

2. Applicant's amendment/arguments filed on 05/04/2009 with respect to claims 1, 5-10, 13-18 and 20-24 have been fully considered and are persuasive. The 35 U.S.C. 103(a) rejection of claims 1, 5-10, 13-18 and 20-24 have been withdrawn.

Allowable Subject Matter

3. Claims 1, 5-10, 13-18 and 20-24 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, considered individually or in combination, does indeed fail to fairly show or suggest the detail claimed method (claim 1) and apparatus (claim 18) for detecting the absence of the LAN or WAN compliant device by "receiving, by the switching input of a tri-state buffer provided on the PCI-compliant front card comprising an FE MAC in the router, a sensing signal from the back card comprising an FE Phy in the router, where the tri-state buffer

is serially disposed on the IDSEL line corresponding to a particular channel, where the tri-state buffer is connected to both a pull up component located on the front card and a pull down component located on the front card; if the sensing signal is a logical low, then coupling the IDSEL signal corresponding to a particular channel of the back card to the front card; and if the sensing signal is not low, then decoupling the IDSEL signal from the front card and providing a logical low signal in the place of the IDSEL signal.” structurally and functionally interconnected with other limitations in a manner as recited in claims 5-9 and 20-24.

Substantially regarding claim 10, the prior art of record also fails to show means for detecting the absence of the Phy Layer device on the back card and communicating the absence to the front card as the same manner set forth in claim 1.

4. Reference(s) US 7,280,591 B2, US 2007/0104124 A1 and US 2009/0097392 A1 are cited because they are put pertinent to monitoring the link partner through MAC and Phy circuit in the communication system. However, none of references teach detailed circuit and method as recited in claims 1, 10 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
